

TRIITON MONITORING

Patrols & Reporting

Patrol device fit for the tough South African security landscape, complete with training videos on usage, a support team ready to assist and instant whatsapp alerts.

Real-time
messaging

Dedicated
technical team

Rugged

Time & Attendance Made Easy

Seamlessly handovers ensuring *continuous site coverage*. Detailed reports track attendance, while instant *WhatsApp* notifications keep managers in the loop - enhancing **accountability** and **operational visibility**.

Rugged. Reliable. Ready for Duty.

Engineered to perform in the *toughest environments*, this device is designed for longevity. Making it the ultimate tool for **demanding** and **strenuous** site requirements.

All-in-One Efficiency

This single device combines *every essential function*—voice, messaging, time and attendance tracking, and patrol management - in **one powerful resource**.

WhatsApp & Push to Talk

Enhance operational efficiency with seamless communication across your entire team. The device comes preloaded with a secure, restricted version of WhatsApp - enabling real-time messaging between security officers, the control room, managers, and clients, all while minimizing the risk of misuse.

Guard Patrols

GPS and NFC technologies ensure **officer accountability**, which increases productivity. Real-time officer monitoring gives **peace of mind** that duties of preventative rounds and active surveillance are being fulfilled

Worry-Free Connectivity & Support

Forget the hassle of data, misuse and technical challenges. We take care of it **all** - data plans, usage restrictions, and system management. Our **dedicated technical team** can troubleshoot, update, and assist remotely and instantly, ensuring smooth operation without interruptions or complications.

Real-Time Alerts

Stay informed and in control with **instant notifications** sent directly to WhatsApp, whether it's officers clocking on or off, site coverage updates, or missed patrols. Relevant managers, supervisors, and controllers receive **timely alerts** to their mobile phone or control room computer - ensuring swift action and total oversight in the most **clear and seamless** way possible.

Ease of Use

Built for the demands and requirements of the *South African security landscape*, this durable device provides easy-to-follow instructions. **Guiding** officers on when to begin patrols and reminding them when it's time to recharge. While designed for simplicity and intuitive use, **training videos** ensure that every officer can quickly get up to speed and operate the device with confidence.
