

PTT & TRACKING

Applicable to all devices

Push-to-Talk Communication – Instant, Reliable, Recorded

Our handheld devices are equipped with **Push-to-Talk (PTT) communication** and time tracking tools designed specifically for *armed response, security, and emergency teams.*

KEY FEATURES:

Instant Voice Communication

One button. One channel. *Instant connection.* Communicate with field officers across zones, teams, or roles.

SOS Panic Alerts

Officers can trigger an SOS signal via their device, *notifying control room and key personnel* with priority alerts and GPS location.

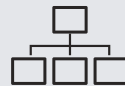

Supervisor Listen-In

Control rooms and higher-level personnel can *monitor multiple channels simultaneously.*

All Communication Logged & Recorded

Every PTT voice exchange is *automatically recorded*, time-stamped, and stored, ensuring full accountability.

Multiple PTT Channels

Create *dedicated channels* for control room, patrol teams, management, emergency response, or specific sites.

All on One Device

- Rugged Android-based handheld
- PTT communication
- SOS button with location ping
- Live & historical GPS tracking
- Integration with WhatsApp, OB logs, dispatch systems & reports

Faster Reactions, Safer Officers - Get immediate updates and respond faster to threats or incidents.

Unmatched Oversight - Listen, watch, and track from one interface.

Total Evidence Trail- Recorded PTT conversations and GPS logs provide a complete operational audit trail.

Simplified Communication Infrastructure - No more juggling radios, phones, or multiple devices. Our handhelds replace them all with *a single, rugged, intelligent unit.*

Our PTT & Tracking platform empowers your field teams and control room staff with the clarity, command, and communication they need.

Request a demo today and see how this platform changes the game for frontline operations.
