

ARMED RESPONSE

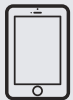

Our *Armed Response Electronic Occurrence Book & Response System* is designed specifically for **high-performance teams** that demand **speed, accountability, and clarity** in every response

KEY FEATURES:

Live-Traced Handheld Devices

Every unit is *GPS-enabled and fully monitored* - for improved control, safety, and accountability.

Custom & Standard Dispatch Software

Seamless integration with your *existing armed response systems*, or choose from our fully customizable dispatch tools.

Instant WhatsApp Updates

Automatically notify clients the moment a response officer visits the premises using time-stamped messages.

Integrated Navigation

Built-in Google Maps and Waze ensure the fastest response routes, *directly accessible* from the device.

Embedded Restricted WhatsApp

Keep teams *connected while maintaining security* - use a locked-down version of WhatsApp to automate and control communication.

No More Paper Response Letters

Digital reports and *real-time updates* instead of delayed, handwritten slips.

Smart, Secure & Paperless Operations – All From Your Handheld

Reduce Paperwork, Boost Efficiency

Improve Client Trust & Transparency - Real-time notifications and digital reports keep clients in the loop.

Enhance Safety & Oversight - Track every movement and interaction.

Easy Compliance & Oversight - Full audit trail for regulatory, insurance, or internal review needs

Take Control. Respond Faster. Report Smarter.

Let us help you modernize your armed response operation with handheld tools that deliver unmatched professionalism, performance, and peace of mind.
